

In the past decade there have been 186 school shootings. 356 have died.

The people who did the shooting got the guns illegally.

With threats by School Districts to remove SRO's who's left to defend our children if another person comes on campus and kills our kiddos?

We need to look at the unintended consequences and we have a right to protect ourselves from potential harm.

This legislation will make one of the top targets of mass shootings even more of an incentive. Please Vote no on this particular legislation.
