

If the Committee wishes to move forward with this bill, it needs to be amended at Section 1, item 19 to read: Motor vehicle headlights OR DAYTIME RUNNING LIGHTS.....

The reason is that many of the newer cars today have automatic headlights. My car, when started in the garage, automatically turns the headlights on and when I back outside and it is daytime changes automatically to daytime running lights, if it starts to rain the headlights automatically come on and changes back to daytime running lights when the sky brightens up.

Please consider this important addition because daytime running lights are not headlights.

Thank you for listening.
