

This bill is not only setting up traps for law abiding citizens but it is unnecessary. If you do your diligence and research concealed carry you will find that people who carry firearms commit fewer crimes than the general public and use firearms in public only when needed to defend themselves or others. By setting up gun free zones you create areas where mass shooters feel protected and therefore target. Gun free zones are a very small part of places yet they are where most mass shooting occur. This is no coincidence. Whether you are a democrat or a republican if you care about the citizens of Oregon you will see to it this bill dies. If not then quite frankly you will be voting to increase the risk of gun violence in these places. That is the science and the fact. I do not expect you to take my word for it so do your diligence and research these facts then vote to protect Oregonian's by killing this bill.
