

I strongly oppose SB 554. There is no way to communicate to each gun owner the specific laws of independently established no-go zones. Where will all of that information be stored and immediately accessible to gun owners? They would need to carry all of that data with them in order to drive across town legally. I compare it to a snake pit where you have no idea where to step. If you guess wrong you're a felon. It would make a mockery out of CHL. This bill is a full on attempt to eradicate our Second Amendment rights. In the end, only criminals would have guns.
