

I don't think I had a teacher of color in any of my educational experiences. This has kept me from seeing various perspectives throughout my education. I have had colleagues, who are people of color.

Our students deeply desire to have teachers and administrators who are people of color. Our school and our district has made a small bit of progress in this area in the last six years. If we need to make layoffs, we need to insure that we do not reverse the progress that we have made.
