

I support this bill. If the purpose of prison is to rehabilitate and send people's back into society to be contributing members then allowing them to continue to participate and make decisions that effect them through voting should be allowed. While this addresses the voting piece, there needs to be an overhaul of our criminal justice system and release non-violent offenders, put in prison through systematic racism. Systematic racism has allowed more BIPOC to be incarcerated. It's time to start doing the right thing for the BIPOC communities and acknowledge our complicity in racism, and become anti-racist.
