Re: I OPPOSE [HB 2670]...

[HB 2670] illustrates the "unequal distribution" of taxpayer's money to counties subsidies to support childcare services.

Again, people who choose to have a family must provide for their own children and cease crying society owes them an entitlement to support the care of their children.

Again, childcare providers consistently bemoan their financial dreams of being paid a wage the marketplace doesn't respect. Artificial price supports will only increase once the childcare provider decides to cry economic disparity again and again.

Again, it is always a sad indicator of society, when parasitic nonprofit corporations and or other assorted special interest groups, are perpetually funded or are seeking perpetual funding by government handouts through asserting the "racial card" as a viable and justifiable excuse to support their argument for funding and or increased funding to support their own financial well-being.

Again, The State of Oregon should be "weaning" people off this program with the intent to defund the program in its' entirety.

Again, why should taxpayers pick-up the tab for raising someone else's children?

Again, why should parents have children they cannot afford to raise themselves and why would they want someone else to raise a member or members of their own family?

****[HB 2670]** is even more despicable for it propagates a discriminatory allocation system to Oregon counties who should all be treated equally.

[HB 2670] is another creation of an unsustainable entitlement.

My solution remains the same, if you can subtract tax money The State of Oregon compels me to pay, to support this boondoggle, go ahead, you have my blessing to go forward. Otherwise, go pound salt.

Respectfully submitted,

/s/ David S. Wall
