

I, Karen Macy, am more than happy and excited to offer my support for HB 2574. At the age of 68, I have never wanted to be either embalmed OR cremated, as both are not contributors to the care of our beloved earth! I strongly feel that we Oregonians need other options than what we presently have. So PLEASE consider this Bill very carefully. Taking care of ourselves, loved ones and our earth is VERY important. Thank you for your support!!
