Oregon
Legislators:

Please pass legislation to allow
members of PUDs and HOAs to
opt out of having pesticides applied
to their yards.

I live at Shataugua Trace HOA in
Ashland. I feel like my rights are
being violated when the landscapers
spray poisonous pesticides on my
front lawn. I get no choice.

Pesticides and herbicides promote
DNA mutations and cancer. They also
appear to play a role in neurodegenerative
diseases such as Parkinson's, Alzheimer's,
and Multiple Sclerosis. Not to mention
what they do to the soil critters and
pollinators!

Thanks for your help,
Debra Wilson
