

I support SB574. Once the warmer weather hits I am on one of my motorcycles constantly. The worst part of riding around town is the traffic, people do not watch out for bikers and it can be a bit nerve racking because I have to look at every vehicle as if they don't see me. Coming from California where lane sharing is legal it felt so much safer being able to skip to the front of the line at a stop light and not having fear of someone not seeing me and being rear ended, as I have seen it happen many times. This is my main reason for supporting this bill, thank you
