

I am a survivor of a motorcycle accident caused by a motor vehicle in a huge hurry and not paying attention to there surroundings i am one of the very few to survive such a horrific ordeal,unlike the thousands killed every year from being rear ended on a motorcycle alone cuz the driver in the car was distracted by either their telephone a cranky baby, hot coffee or simply daydreaming and didnt relize that traffic is at a complete standstill and the motorcyclist is rear ended and 99% of the time killed at the scene of the accident simply because they had nowhere to go so I support with everything I believe in bill SB 574 and i respectfully ask for a yes vote to pass bill SB574 and give riders a fighting chance to save thier own life by not being a sitting target for the driver who fails to stop thank you ...respectfully yours yes on SB 574...
