

I have concerns about this bill and its targeted effects. We have seen multiple times where members of the LGBT community will learn that small businesses are owned and ran by Christians and they will purposely go into these establishments with the intent to try to force these Christian owners into a position that would pit them and their faith up against a politically correct decision. The businesses in particular that I speak of would be those that involve expressions of art. But this could also lead to forcing professional sports for instance women's sports teams into a position where they would face a bias crime because they wouldn't let a biological male transsexual join the organization and compete against women. I see this bill as a means to weaponize cases against the religious community. If that's what this bill will be setting up for and I believe it is, then it must be killed right away as you have no right to discriminate against the religious community for taking a side that is in keeping with their faith and science. Thank you.
