

I am in high support of SB 574!!

As a woman, weld-supervisor, and avid motorcyclist... Safety is one of the highest things I preach! Three months ago, I was at a stop light in extreme backed up traffic and I got rear ended by somebody behind me going over 50+ mph! It totaled my car, gave me a head injury, and the hospitals were full; with a huge wait, because of covid19.

I had nightmares for months and don't trust any drivers, WORRYING about this same scenario on my motorcycle is my worst nightmare!

Backed up traffic, overheating, and inattentive drivers are avoidable when your an experienced motorcyclist. I've ridden all over the country. It's a proven fact that highly populated areas (I've ridden in NYC and California) thrive with traffic flow. Portland area is starting to get more dense, more populated, and carefree. The freedom and love I have shared with my motorcycle passion, has literally saved lives;

Passing this bill would save SO MANY MORE!

Thank you so much for listening to my story, I never have done anything like this, because I just assumed my voice didn't matter. This is important, and all motorcyclists agree with me! I can't wait for more of america to learn what love is! Because that's exactly what you feel on a bike.
