

Traffic through the city is getting worse. I have ride a motorcycle for many reasons but a key aspect is better gas mileage.

More than once I have been in bumper to bumper traffic and had motorcycle stall. The bike over heated due to lack of RPM's. Then I further blocked traffic dealing with my machine.

Lane splitting would allow traffic flow to increase and would keep motorcyclist out of harms way.

Safety, the environment and reduction of traffic are all reasons to vote yes.

Thank you
