

Hello,

I respectfully request your support of SB574. Lane sharing/splitting/filtering is something that would make riding much safer for me as a motorcyclist. I've been rear ended twice in the past two years and the ability to legally filter between traffic would both reduce congestion but also reduce the possibility of getting hit from behind by someone not paying attention. In addition, limiting speeds that motorcyclists can travel when lane sharing makes it much better on the nerves of those in four wheeled vehicles in traffic. I look forward to being able to share the road more efficiently and safely.

Thank you for your consideration.
