

Please vote yes to legalize lanesharing in Oregon. I would prefer that the rules be harmonized with California's, the CHP knows what they're doing. As someone with 20 years traffic experience on motorcycles in Seattle, San Francisco and Portland, I have seen evidence with my own eyes that lanesharing works.

It just makes sense to follow the leader. There's no need to study the problem into oblivion, the time is now to make things right and implement the law. Thank you.
