##### **EFFECT OF AMENDMENT:**

No amendment.

##### **BACKGROUND:**

Certified Community Behavioral Health Clinics (CCBHCs) are clinics designed to provide a comprehensive range of mental health and substance use disorder services, particularly to vulnerable individuals with co-occurring disorders. They were created through Section 223 of the Protecting Access to Medicare Act (PAMA), which established a demonstration program based on the Excellence in Mental Health Act. CCBHCs serve adults and children by providing a comprehensive array of services that are necessary to create access, stabilize people in crisis, and provide the necessary treatment for those with the most serious, complex mental illnesses and addictions. In 2015, Oregon was awarded a planning grant to develop CCHBCs to expand behavioral health services and workforce, pilot alternative payment methods, and align with ongoing health transformation efforts. In 2017, Oregon was awarded a two-year federal demonstration grant which was extended through May 2020. Oregon's CCBHCs are required to provide an array of services, including crisis mental health services, targeted care management, peer support and family supports, and outpatient mental health and substance use services. As of January 2020, there are more than 20 CCBHCs across Oregon that have met state and federal standards to become a CCBHC.

House Bill 3123 requires the Oregon Health Authority to evaluate the state's Certified Community Behavioral Health Clinics and report to the Legislative Assembly no later than December 1, 2020.
