	LANDSLIDE MODELIN	[G					
10	Expedited landslide modeling. Contract pro						
	A key part of the PFA agreement is the approach to limiting the negative impacts of steep slopes logging on aquatic habitats. Instrumental to this approach is conducting state of the art modelling to identify up slope areas that are most prone to delivering sediment to fish streams and the channels that might carry debris flows from those slides. This modelling needs to be completed in an expedited fashion to provide the foundation for future rules and field prescriptions.						
	SUBMISSION OF HABITAT CONSER	VATION PLAN					
11	Directs board to submit HCP based on PFA						
12	Submit by Dec. 31, 2022. Rapid contracting	g.

	These sections accomplish all of the Small Forestland Owner provisions of the Private Forest Accord save the specific tax credit that is outlined in SB 1502. Key components include: the creation of a new SFO office at ODF to ensure training and implementation of the various provisions for SFOs envisioned under the PFA; the creation of a new SFISH fund and program that will help support road and fish passage improvements on SFO land and; establishment of the "small forestland minimum option."							
	BEAVER (CASTOR CANADENSIS) CONSERVATION							
21	Beaver sections added to ORS Chapter 498 Wildlife laws							
22	Requires report of beaver taken on private forestland							
23	Problem beaver non-lethal approach with waiver for large owners, ODFW relocation							
24	Beaver rules done by end of year							
25	Beaver commerical take prohibition for large ownerships. No compensation except for problem beaver trapping. No sale of pelts.							
26	No effect on other predator control rights.							
27	No effect on other rodent or predator control rights.							
	Beavers provide incredibly important ecological benefits for aqautic species and this section implements new protocols that help to track beaver take on private forestland and focus conflict resolution on non-lethal approaches.							
	MITIGATING EFFECTS ON AQUATIC WILDLIFE							
28	Mitigation fund established; subaccount of Oregon Conservation and Recreation Fund (OCRF)							
29	Mitigation fund not controlled/advised by OCRF Advisory Committee							
30	Creates PFA Mitigation Advisory Committee PFA MAC							
31	Initial membership in PFA MAC							
32	Use of funds in PFA MAC							
	As part of the PFA, the forest sector and the state have both committed to fund a mitigation account aimed at benefiting the species that are subject to the HCP. These activities could include off-forest habitat improvement, in stream water right purchases, land easements, etc. The mitigation fund will be housed within the Oregon Conservation and Recreation Fund and funds will be granted out by an advisory committee made up of forest sector representatives, conservation representatives, and state agency staff.							
	ADARTHUE MANIACMENT							
	ADAPTIVE MANAGMENT Adds sections to OFPA statute							

34	Goal of Adaptive Management
