BACKGROUND:

The Department of Consumer and Business Services' (DCBS) Division of Financial Regulation regulates individual and small group insurance policies sold in Oregon. Regulatory activities include monitoring compliance with mandatory benefit requirements and appeal and grievance procedures, as well as reviewing and approving insurer rates.

Pharmacy benefit managers (PBMs) are companies that manage prescription drug benefits on behalf of health insurers, large employers, and other payers. PBMs negotiate with drug manufacturers and pharmacies to control drug spending, impacting total drug costs for insurers, shaping patients' access to medications, and determining how much pharmacies are paid.

House Bill 4132 would require the Department of Consumer and Business Services to meet monthly with specified health care providers to discuss providers' concerns regarding health insurer practices and require the Secretary of State to conduct audit of practices and drug pricing mechanics of pharmacy benefit managers that contract with state agencies.
