

Submitter: Peter Dragovich

On Behalf Of:

Committee: House Committee On Revenue

Measure: HB4115

Oregonians deserve to know how much risk climate degradation poses to investments managed by the Oregon State Treasury. The standard of transparency needs to be raised so all Oregonians can know where their money is being spent and based on that knowledge provide informed comment to elected officials.

Transparency is the foundation for trust in a representative democracy. Without it the people cannot make informed decisions over their own lives. Please approve HB 4115.
