

Submitter: Donna Bleiler

On Behalf Of:

Committee: House Committee On Environment and Natural Resources

Measure: HB4058

This is a socialist feel good bill that tries to imply that this bill would have saved the 100 people that died in the heat wave. As it turned out, there wasn't a lack of resources to cool them, but there was a gross lack of communication in knowing they needed help. This bill does nothing to improve communication to get available resources to them.

This program will just make some manufactures rich at the expense of taxpayers to provide people with upgrades to whatever they on using for cooling their homes. We don't need another government program, we need to make sure people have safe water to drink and portable air or fans.
