

Submitter: Marion Malcolm
On Behalf Of: HB 4124
Committee: House Committee On Education
Measure: HB4124

This is to express my support for HB 4124. As a former teacher, mother of a teacher, and grandmother to school-age kids, I am concerned about the time and money spent on test preparation and testing. I think we need to know what tests are given and who does and does not benefit from all that testing. I suspect that neither kids nor teachers benefit from many of these tests --- but let's find out!

Sincerely, Marion Malcolm
