

Submitter: Nick Haskins
On Behalf Of: Claudia Hernandez
Committee: Senate Committee On Health Care
Measure: SB1530

Hello,

I believe that everyone deserves the right to be covered and supported throughout their entire fertility treatment. From the beginning where extra precautionary preparation may be required through birth and postpartum care phases. Everyone should be able to create a family if that is their desire; not just those who can afford the high costs out of pocket or have the privilege to work for an employer willing to pay the extra costs for fertility support treatments.

Thank you,

Claudia Hernandez
