

Submitter: Joanne Delmonico
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB4115

As an Oregonian, I want to know where state funds are being invested. Let's show our commitment to transparency. We are facing unprecedented heat waves and other climate related weather events. It is time to act. The first step is letting all Oregonians have access to investment holdings. We want to know and deserve to know...how is our state money contributing to this crisis? The Treasury only shares about half of their investment holdings on an annual basis on the Oregon Investment Council (OIC) website.

I am impressed with New York and Maine and so many other states and institutions that are divesting from fossil fuel...let's join them and we can tell our kids and grandkids that we made the right choice!

Thank you
Joanne Delmonico
