

Submitter: kim davis
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB4115

At a time when global populations are repeatedly overwhelmed by the devastating impacts of climate change, Oregon citizens want investments to be made that support mitigating those environmental changes and reducing harms caused by reckless corporations and investors. HB4115 will ensure that our Treasury publicly releases information about OR investment holdings, which currently do include investments in climate-wrecking fossil fuel and industrial forest corporations, along with any climate risk assessments.
