

Submitter: Lorraine Heller
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB4115

Climate change is real and we in Oregon are beginning to experience the effects. We had several heat waves last summer. And who can forget the days of smoke from forest fires when we had to stay in our homes.

We deserve to know how much State money is invested in the fossil fuel industry. Oregon Democrats have stated that they want to protect our environment and work for a sustainable future. The Oregon Treasury has \$130 billion to invest. Where does it all go? The investment holdings are public information and should be readily available to the public.

The Treasury Transparency Bill HB4115 will shine a light on where our Oregon State Treasury investment money goes.

Please this bill.
