

Submitter: Eugenia Tam
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB4115

Members of the House Committee on Revenue,
For both ethical and financial reasons, the public should have a clear picture of how public funds are being invested. I strongly support HB4115. It will be a first step towards Oregon divesting from fossil fuel industries, which will reduce the climate risk of our holdings and stop our support of these industries that are worsening climate change.
Thank you.
