

Submitter: Riley Haragan

On Behalf Of:

Committee: House Committee On Health Care

Measure: HB4101

I am in support of HB4101. These are gross habits that still affect people even though they do not engage in them directly. My family and I are constantly being forced to walk through noxious clouds of something to go into a variety of public spaces. I would like to increase the distance to even more than 25 feet if possible, but I'll take what I can get.
