

Submitter: Jed Irvine
On Behalf Of:
Committee: House Committee On Revenue
Measure: HB4115

Dear Representative Nathanson and Committee members,

I'm writing to express my support of HB4115. Lack of transparency in handling of state funds no doubt makes the jobs of those responsible for that much easier. However, it makes the job of ensuring we are addressing climate change more difficult. Even if every one of our jobs became twice as difficult in order to address climate change, there's still no question that it would be the right thing to do. At this point, every single policy decision that affects climate response counts. We are out of corners to cut.
