to me

Hello,

My name is Melissa Lapp. I am a patient of a Naturopathic Doctor, and your constituent.

My ND is AWESOME, and has greatly helped myself, and other members of my family with various health conditions, even after seeing other medical providers. My daughter's ND helped her with multiple food allergies, resulting in an improved quality of life she had previously not known. ND's take an incredibly deep dive into their patients' medical histories, resulting in far better care than I've experienced elsewhere.

More choices are needed for others to access this incredible network of capable and professional doctors. Right now in Oregon, ND's are getting a short straw in compensation compared to other providers.

That must change so more people can experience the dramatically improved quality of life my family has.

Please vote YES on HN4006, and support fair pay for Naturopathic Doctors.

Thank you,
Melissa Lapp
