

Submitter: Sarah McKenzie
On Behalf Of: PERS Member
Committee: House Committee On Revenue
Measure: HB4115

I taught for 34 years, 14 of them for Portland Public Schools. I am grateful to be a member of PERS now during my retirement and care about my investments. I am especially concerned about my investments supporting businesses that effect climate change (or other nefarious businesses). All my additional investments are in socially responsible financial institutions. I and the public deserve current, complete information on PERS investments along with their climate assessments. Let's educate each other and do the right thing. Please support HB4115.
