

Submitter: Bill Harri
On Behalf Of:
Committee: Senate Committee On Energy and Environment
Measure: SB1589

Members of the Committee

I congratulate the people who have demonstrated the imagination and the ability to arrange another water sport.

The major physical disturbance to the river, its natural inhabitants, other human use of the river, and the shoreline is too much damage to permit continuing this sport. Please pass SB1589 as soon as possible before more people invest in wave-making equipment.
