

Submitter: Patricia Kubala

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

Myself and my husband, John Mills, are strongly in favor of SB 1589. There needs to be some regulation of Wave Boats due to their serious impacts on other recreation users, river habitat and private property. We hope you will give your full support to this important bill. The river is for everyone and one group of users should not be able to impact other users to the degree they are presently. Thank you for your support.
