

Submitter: Jennifer Jacobson Brusa
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1521

Dear Senators,

Take a pause.... think through the implications going forward. Why would we take away the authority of the school board members at of the local level and put it in the hands of the state? The state level is not as invested in the details of the local arena. The state does not invest time and energy or time at the local level to make the best decisions that impact the local community. And that is not how the system was intended to operate. State intervention at the local level is authoritarian and goes against what created this beautiful country around freedom. Local level has more passion and investment. The state level does not have the time or energy to do the due process. If an entity takes the public funds then the public should be able to have a say. Period. Each layer has a purpose and a function. We need to honor that. Take that pause. Map out the greater implications.
STOP this bill.
