

Submitter: Laurel Kaufman

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

I strongly support this bill. The use of larger and larger boats and waves negatively impacts all other people and wildlife who use or live in or on the river. Private property is being damaged. Wilder shoreline is also being damaged. These large boats negatively impact all other folks who use the river. Our Willamette River is precious and it needs this bill to help preserve it.
