On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1537

SB 1537 will make it harder to enact necessary regulations or rules. If passed, this bill will have many harmful consequences. It is clearly an anti-regulation legislation that is intended to constrain state agencies and make it harder to enact new and necessary regulations. This bill would result in high costs for agencies to comply with, and there will be significant fiscal impacts on state agencies. This bill is presented as a way to protect low-income citizens, but it was not crafted in collaboration with low-income citizens or their advocates -- it was crafted by the Oregon Homebuilder's Association and their allies to support their profits.
