

Submitter: Loretta Johnson  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB4133

Dear House Committee Members,  
I am OPPOSED to HC 4133. An example of how fraud can occur, recently I had someone try to break into my Oregon DMV account online. I called when I realized what was happening and agent confirmed that someone had tried to get into my account. The agent of the DMV told me that if they would have got in they could have changed my address and paid a bill. This is very concerning considering this is where we register to vote and change our registration using the My Vote Portal accessed through the DMV.

The same could very well happen through our Social Security Administration and moreover by allowing third-party organizations to submit registration cards electronically on behalf of individuals there is more opportunities for mistakes and fraud. "Too many cooks in the kitchen" and the final product - voter integrity, voter confidence, clean and accurate voter rolls, voter rights and responsibility are all NEGATIVELY AFFECTED!

Most importantly there are thousands and thousands of Social Security Numbers stolen and currently illegally used here in the United States. This is one more way for Voters to be Disenfranchised. Social Security numbers do not provide any evidence of Oregon residency again opening the door to fraud.

Stop and OPPOSE HB 4133 2022
