Of:

Committee: Senate Committee On Judiciary and Ballot Measure 110  
Implementation

Measure: SB1540

I work in the emergency room of a level one trauma center and I do not have words to express the pain and fatigue that lack of resources for patients with addiction disorder is causing most front-line medical professionals. The situation is heartbreaking and overwhelming. To take funding away from an epidemic and reallocate it to police is deeply disturbing to hear. I hope you can understand how this would, not only impact the individuals and families losing their livelihood and recovery potential to addiction disorder, but how this could even further burden the morale of emergency room workers. Please consider these very strained population in your discussions.
