

Oregon House Bill 4053

I am a long time Tillamook County resident who has travelled Highway 6 for over 30 years. This stretch of highway has increasingly become more treacherous with multiple accidents, including fatalities, each year. We need: cell service through the pass; more police units controlling speed limits, tail gating and irradicate driving behavior; additional and larger pull-outs for slower traffic, emergency personnel, and for chaining up during inclement weather; road repairs, especially to potential landslide areas; increased fines for illegal driving with the additional requirement to terminate driver's license for ongoing infractions. I implore the state of Oregon to pass HB 4053 so that the multitude of highway issues can be thoroughly studied and researched; upon which time, I have no doubt you will conclude that much can be done to improve the road conditions to lessen MVA and fatalities.
