

Submitter: Lee Morgan

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

I am in complete opposition to creating any such program this being Oregon Freedom Pilot Program that creates and in acts any added taxation on we the public to provide

stipends to low-income families which I have been one of most of my adult working life. If the Dept. of Human Services wants to create such program they need to do so with funds that exist within their existing budget. I as a citizen even though growing older continue to go to work everyday 5 days a week even though I could be retired

but I choose to continue to work so as not to be an added burden on society. Again I am completely opposed to added taxation in order to provide stipends to anyone. Any added taxation is and would be a burden on such as myself and many others.
