

Submitter: Robert Hart  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB4133

Dear Representatives,

I am opposed to HB 4133 for the following reasons:

- 1 There is nothing in the bill to verify that a social security number is valid. There is no coordination with the federal government to verify that the person is a resident of Oregon or that the person is of legal voting age.
2. Social Security numbers are not supposed to be used for identification but only for Social Security Benefits. Medicare cards were using SS numbers for medicare benefits but was changed to create a completely new identification number as fraud became rampant.
- 3 Using a Social Security number would make the voter system a prime target for hackers to get information in one location for identity fraud and possible harm to the voter roles of qualified persons.
- 4 Creating a third party system for gathering electronic signatures adds to the possibility of fraud by placing multiple signatures of potential voters into the hands of a third party. The wording says that the third party would submit the requests for others. The potential voter needs to submit their own request and not put the information in the hands of others. There are no qualifications for these third parties to show their qualifications to represent others. There is no power of attorney given to represent another individual. The question of one person one vote is jeopardized by inserting a third party into the voting system.

I implore you to stop this proposal now before any further action is taken that would harm election integrity.

Respectfully  
Robert Hart  
Rogue River, OR
