

Submitter: Elle Smith

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

I oppose HB4079. If DHS provides monthly stipends to low income families there will be no incentive or motivation to get out of poverty. The cycle of poverty will continue generationally. This creates a “nanny state” and goes against everything America stands for. People need to appreciate the value of hard work and education. We should be encouraging people to work hard and better their lives, not depend on government handouts.
