

Submitter: Shelley Reimer

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

I oppose HB 4079. Oregonians have been through two years of undue burdens as it is, and adding a new and additional tax on us after we are all facing rising prices on everything from gas to bread to rent, is not good public policy and will not result in positive results for either the people, nor those of you who want our vote! We do not want any new taxes of any kind, regardless of the fact that it may be on only select items to begin with. We all know that eventually you will lower the price points of items included in this tax, and you will eventually add more services and products to fall under it as well. We KNOW this because this is what you do! Do not pass any tax on Oregonians. We are burdened enough! NO ON THIS BILL!
