

Submitter: Pete Sipos  
On Behalf Of:  
Committee: House Committee On Human Services  
Measure: HB4079

Please do not fund this kind of support. The existing support we provide to people without jobs is keeping them from coming back to work. I have many employees, family and friends that know of people who will not work because our Government system will not make them work and they do not need to do so to get buy. There are plenty of jobs out there in our communities for the willing and able to work. My Company is like most companies in my community with multiple job openings that we cannot fill. This is a major issue in our Country and this type of Legislation will only worsen our problem. The problem is that we are incentivizing people to not work. If we are going to give money to support these people who are struggling then make them work for it, with the rest of the employees of the state. Make them work at the parks and public facilities to earn the money they receive. Then if they do not like the work they are required to do to receive the assistance then they can take one of the hundreds of jobs that available today to earn there keep. Human beings will go to the path of least resistance in most circumstances and will continue to take assistance as long as you keep giving it. It is Human nature.

Sincerely,

General Manager
