

Submitter: Liz Martin

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB4141

HB1414 is a slap in the face to every Oregonian. We have the right to choose what works for our lives and what doesn't. Legislature nor governor has any right to restrict the types of vehicles we drive, the availability or cost of those vehicles, and the types of fuel to run them. We all make choices in our lives with the information we gather. We have the right to make our own choices. Until it is comprehensively proven that "global warming" is accurate, scientifically a fact, and not, without doubt, governments, legislature, politics need to stay out of it. There is MUCH doubt in the scientific community that global warming is even real. We know this planet has had multiple cycles of heat and cold, many different science types have proven this.

This bill does nothing more than demonizing those of us who use diesel fuel. This bill is inappropriate and should be killed immediately. We Oregonians have no faith in our politicians anymore and this coming voting season will reflect on that. Those not listening to the people they represent will reap the reward of republican turnover. That is from a true independent who has never voted party lines...but right now a lot of us are seriously reconsidering. We will not forget the passage of bills that we have all spoken out against and that are unfair and unjust.
