

Submitter: Susan Weinstein

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1567

We need earthquake preparedness urgently. SB 1567 will provide an important and necessary start for action and accountability by our fossil fuel and toxic chemical industries to minimize earthquake damage. In an article in today's 'New York Times', 'The Tsunami Could Kill Thousands', Corina Allen, the chief hazards geologist in Washington State is quoted as saying, "Every year that the earthquake doesn't happen, there's a higher chance that it will the next year." We don't have a moment to lose. Thank you for supporting SB 1567.
