

Submitter: Jon Kleinman

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: SB1589

To whom it may concern:

I oppose this bill. The free usage and community resource of our waterways should not be further restricted. It is already too restricted. I vehemently oppose any further restrictions to wake sports on the river and in the Newberg pool. Our family uses the river to recreate and we get immeasurable enjoyment out of wakeboarding, wake surfing and waterskiing on the river. Furthermore, this matter was really already settled last year and revisiting it is a waste of taxpayer resources. Please vote in opposition to this bill and any further restrictions on citizen use of our common waterways. Thank you for your consideration.
