

Submitter: Carlee Smith

On Behalf Of:

Committee: House Committee On Human Services

Measure: HB4079

I support this bill because it does not further tax working people or their income but taxes luxury items like yachts and private jets. This bill provides a basic income to people who might fall through the cracks or be in danger of becoming houseless. We know that 18 year olds transitioning out of foster care who dont have family support are more likely to end up homeless. We know that low income single mothers and their children are always in danger of becoming houseless. This bill helps provide needed support to prevent that.
