

Submitter: Manfred Wiesel  
On Behalf Of: self  
Committee: Senate Committee On Energy and Environment  
Measure: SB1589

Please reduce the "LOAD" to the Willamette, especially with the more and more dry years, there will be very little water in the river which will make the wave problem worse.

Please move heavy boating to the lower river or the Columbia, they are much more suitable than upriver. And big power boats ARE not suitable next to swimmers, paddlers ...
