

Submitter: John Drzal  
On Behalf Of:  
Committee: Senate Committee On Energy and Environment  
Measure: SB1589

To the members of the Senate Committee on Energy and Environment,

I support and urge your approval of SB 1589 with the reservation that the 4,000 pound weight standard proposed during the fall, 2021 Legislative session is the more appropriate standard. I also support additional studies of the effect of wave surfing on the River environment, private property and, most of all, on the safety of non-motorized users of the Newberg zone. SB 1589 is a good first step toward protecting the River and enhancing the recreational opportunities of ALL Oregonians.

Thank you for your consideration,

John Drzal
